The amendment received 3 March 2006 has been made of record. Claims 1-41 are pending.

The rejections based on USC 103 contained in the previous office action are withdrawn in view of applicants' arguments.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 13-15, 20-24, 27 and 39-41 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants' recitation of a "Fischer-Tropsch derived gas oil" in the rejected claims is not defined in the specification in such a way as to enable one of ordinary skill in the art to produce the invention. The descriptor "derived" is not defined in such a way as to enable one of ordinary skill in the art to produce the invention.

Claims 1-41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1714

Independent claims 1, 13-15, 20-24, 27 and 39-41 and all other claims through their dependence recite a "Fischer-Tropsch derived gas oil". The descriptor "derived" is not defined in such a way as to enable one of ordinary skill in the art to produce the invention. The metes and bounds of what applicants consider as meeting this limitation can not be ascertained.
